Chemical Physics

Subject index to volume 226

Methods and constructs

Theoretical

Computational methods for electronic structure

Inelastic neutron scattering study of methyl tunnelling in an oriented single-crystal of 2,6-dimethylpyrazine at low temperature and rotational–potential calculations, B. Nicolaï, E. Kaiser, F. Fillaux, G.J. Kearley, A. Cousson and W. Paulus 226 (1998) 1

Ionization spectra of $XONO_2$ (X = F, Cl, Br, I) studied by the SAC–CI method, M. Ehara, Y. Ohtsuka and H. Nakatsuji 226 (1998) 113

Exchange transfer in high-nuclearity mixed valence magnetic clusters: Theoretical approach and expected manifestations, J.J. Borrás-Almenar, E. Coronado, A.V. Palii, B.S. Tsukerblat and R. Georges 226 (1998) 231

Single- versus multi-state DIM model for Rg X_2 systems: On the influence of spin–orbit coupling on Ar–I_2 potentials, F.Y. Naumkin 226 (1998) 317

-CI and valence bond approach

Infrared and Raman spectra, conformational stability, ab initio calculations, and vibrational assignments for cyclopropyldichlorosilane, J.R. Durig, S.W. Hur, M. Dakkouri, A. Grunvogel-Hurst and T.K. Gounev 226 (1998) 125

Theoretical treatment of the electronic circular dichroism spectrum and the optical rotatory power of H_2S_2, M. Pericou-Cayere, M. Rerat and A. Dargelos 226 (1998) 295

Semiempirical methods

Theoretical study on pyrolysis and sensitivity of energetic compounds. (3) Nitro derivatives of aminobenzenes, H.-M. Xiao, J.-F. Fan, Z.-M. Gu and H.-S. Dong 226 (1998) 15

Vibrational relaxation of SF_6 by the noble gases as measured by CO_2-laser light attenuation in the presence of radial density profiles, M. Lenzi, E. Molinari and G. Piciacchia 226 (1998) 143

Excited-state intramolecular proton transfer in 2-(2′-aminophenyl) benzimidazole, S. Santra and S.K. Dogra 226 (1998) 283

Single- versus multi-state DIM model for Rg X_2 systems: On the influence of spin–orbit coupling on Ar–I_2 potentials, F.Y. Naumkin 226 (1998) 317

Relativistic electronic structure theory

Single- versus multi-state DIM model for Rg X_2 systems: On the influence of spin–orbit coupling on Ar–I_2 potentials, F.Y. Naumkin 226 (1998) 317

Spin states and magnetic interactions
The EPR spectrum of the general $\rangle\dot{C}-CX_3$ quantum rotor, A.R. Sørnes and N.P. Benetis 226 (1998) 151
Exchange transfer in high-nuclearity mixed valence magnetic clusters: Theoretical approach and expected manifestations, J.J. Borrás-Almenar, E. Coronado, A.V. Palii, B.S. Tsukerblat and R. Georges 226 (1998) 231
Time-resolved ESR in a spin-correlated radical pair with large hyperfine coupling constant at ^{31}P. Micellar size effects and the role of flip-flop transitions, V.F. Tarasov, H. Yashiro, K. Maeda, T. Azumi and I.A. Shkrob 226 (1998) 251
Spin-correlated radical pairs: microwave pulse effects on lifetimes, electron spin echo envelope modulations, and optimum conditions for detection by electron spin echo spectroscopy, C.R. Timmel, C.E. Fursman, A.J. Hoff and P.J. Hore 226 (1998) 269

Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)
New propagator schemes for explicitly time-dependent hamiltonians: applications to the multiphoton dissociation dynamics of diatoms and quantum adiabatic processes, S. Adhikari 226 (1998) 25
Theoretical treatment of the electronic circular dichroism spectrum and the optical rotatory power of H_2S_2, M. Pericou-Cayere, M. Rerat and A. Dargelos 226 (1998) 295
Bond-charge calculation of nonlinear optical susceptibilities of $LiXO_3$ type complex crystals, D. Xue and S. Zhang 226 (1998) 305

Collisional and reactive molecular dynamics with non-frictional forces
Theoretical study of the isotope effects in the non-adiabatic reaction of $Ar^+(J)$ with H_2, D_2, HD, M. Sizun and F. Aguillon 226 (1998) 47

Intramolecular dynamics
The EPR spectrum of the general $\rangle\dot{C}-CX_3$ quantum rotor, A.R. Sørnes and N.P. Benetis 226 (1998) 151

Theory of critical behavior
Influence of the Piepho-mode on charge ordering in mixed-valence biferrocenium salts. Mössbauer spectra, S. Klokishner, J. Linares and F. Varret 226 (1998) 171

Experiment

Magnetic resonances
The EPR spectrum of the general $\rangle\dot{C}-CX_3$ quantum rotor, A.R. Sørnes and N.P. Benetis 226 (1998) 151
Spin-lattice relaxation and ODMR linenarrowing of the photoexcited triplet state of pyrene in polycrystalline Shpol'skii hosts and glassy matrices, A.E. Tringali and H.C. Brenner 226 (1998) 187
Time-resolved ESR in a spin-correlated radical pair with large hyperfine coupling constant at ^{31}P. Micellar size effects and the role of flip-flop transitions, V.F. Tarasov, H. Yashiro, K. Maeda, T. Azumi and I.A. Shkrob 226 (1998) 251
Spin-correlated radical pairs: microwave pulse effects on lifetimes, electron spin echo envelope modulations, and optimum conditions for detection by electron spin echo spectroscopy, C.R. Timmel, C.E. Fursman, A.J. Hoff and P.J. Hore 226 (1998) 269

-Molecular spectroscopy
Complete vibrational spectrum of NiCO isolated in solid argon, H.A. Joly and L. Manceron 226 (1998) 61
Infrared and Raman spectra, conformational stability, ab initio calculations, and vibrational assignments for cyclopropyldichlorosilane, J.R. Durig, S.W. Hur, M. Dakkouri, A. Grunvogel-Hurst and T.K. Gounev 226 (1998) 125

SubDoppler polarization spectroscopy of OH ejected by vibrational state-selected *trans* HONO($\tilde{A}^1A''$): OH vector correlations, energy correlation between coincident OH,NO pairs, and energy transfer pathways, R. Vasudev and S.W. Novicki 226 (1998) 201

-infrared
Complete vibrational spectrum of NiCO isolated in solid argon, H.A. Joly and L. Manceron 226 (1998) 61
A mid infrared study of dynamic processes in iodine–pyridine charge transfer complexes, T. Tassaing, M. Besnard and J. Yarwood 226 (1998) 71
Vibrational relaxation of SF_6 by the noble gases as measured by CO_2-laser light attenuation in the presence of radial density profiles, M. Lenzi, E. Molinari and G. Piciacchia 226 (1998) 143

-UV
Effect of substituents on the spectroscopic properties of all-*trans*-1,6-diphenyl-1,3,5-hexatriene, G. Pistolis and A. Malliaris 226 (1998) 83

Measurement of macroscopic variables
Exchange transfer in high-nuclearity mixed valence magnetic clusters: Theoretical approach and expected manifestations, J.J. Borrás-Almenar, E. Coronado, A.V. Palii, B.S. Tsukerblat and R. Georges 226 (1998) 231

Photon counting and phase fluorimetry
Effect of substituents on the spectroscopic properties of all-*trans*-1,6-diphenyl-1,3,5-hexatriene, G. Pistolis and A. Malliaris 226 (1998) 83
Excited-state intramolecular proton transfer in 2-(2′-aminophenyl) benzimidazole, S. Santra and S.K. Dogra 226 (1998) 283

Photoelectron and Auger spectroscopy
Self-assembly of alkylsiloxane monolayers on fused silica studied by XPS and sum frequency generation spectroscopy, A.S. Lagutchev, K.J. Song, J.Y. Huang, P.K. Yang and T.J. Chuang 226 (1998) 335
The influence of non-adiabatic effects on the outer valence shell photoionisation dynamics of boron trifluoride, D.M.P. Holland, M.A. MacDonald, M.A. Hayes, L. Karlsson and B. Wannberg 226 (1998) 349

Multiphoton ionization
The (2 + 1) REMPI spectroscopy of jet-cooled Br_2, R.J. Donovan, A.C. Flexen, K.P. Lawley and T. Ridley 226 (1998) 217

Nonlinear optics and spectroscopy
Vibrational relaxation of SF_6 by the noble gases as measured by CO_2-laser light attenuation in the presence of radial density profiles, M. Lenzi, E. Molinari and G. Piciacchia 226 (1998) 143
Self-assembly of alkylsiloxane monolayers on fused silica studied by XPS and sum frequency generation spectroscopy, A.S. Lagutchev, K.J. Song, J.Y. Huang, P.K. Yang and T.J. Chuang 226 (1998) 335

Synchrotron spectroscopies
Absolute photoabsorption cross section of CCl_4 in the energy range 6–250 eV, G.H. Ho 226 (1998) 101
The influence of non-adiabatic effects on the outer valence shell photoionisation dynamics of boron trifluoride, D.M.P. Holland, M.A. MacDonald, M.A. Hayes, L. Karlsson and B. Wannberg 226 (1998) 349

Mössbauer spectroscopy
Influence of the Piepho-mode on charge ordering in mixed-valence biferrocenium salts. Mössbauer spectra, S. Klokishner, J. Linares and F. Varret 226 (1998) 171

Neutron scattering (inelastic and quasielastic)
Inelastic neutron scattering study of methyl tunnelling in an oriented single-crystal of 2,6-dimethylpyrazine at low temperature and rotational–potential calculations, B. Nicolaï, E. Kaiser, F. Fillaux, G.J. Kearley, A. Cousson and W. Paulus 226 (1998) 1

Objects

Bulk systems

Gases
Absolute photoabsorption cross section of CCl_4 in the energy range 6–250 eV, G.H. Ho 226 (1998) 101
Infrared and Raman spectra, conformational stability, ab initio calculations, and vibrational assignments for cyclopropyldichlorosilane, J.R. Durig, S.W. Hur, M. Dakkouri, A. Grunvogel-Hurst and T.K. Gounev 226 (1998) 125
Vibrational relaxation of SF_6 by the noble gases as measured by CO_2-laser light attenuation in the presence of radial density profiles, M. Lenzi, E. Molinari and G. Piciacchia 226 (1998) 143

Liquid mixtures and solutions
A mid infrared study of dynamic processes in iodine–pyridine charge transfer complexes, T. Tassaing, M. Besnard and J. Yarwood 226 (1998) 71
Effect of substituents on the spectroscopic properties of all-*trans*-1,6-diphenyl-1,3,5-hexatriene, G. Pistolis and A. Malliaris 226 (1998) 83

Crystals
Inelastic neutron scattering study of methyl tunnelling in an oriented single-crystal of 2,6-dimethylpyrazine at low temperature and rotational–potential calculations, B. Nicolaï, E. Kaiser, F. Fillaux, G.J. Kearley, A. Cousson and W. Paulus 226 (1998) 1
Infrared and Raman spectra, conformational stability, ab initio calculations, and vibrational assignments for cyclopropyldichlorosilane, J.R. Durig, S.W. Hur, M. Dakkouri, A. Grunvogel-Hurst and T.K. Gounev 226 (1998) 125
Bond-charge calculation of nonlinear optical susceptibilities of $LiXO_3$ type complex crystals, D. Xue and S. Zhang 226 (1998) 305

-mixed
Spin-lattice relaxation and ODMR linenarrowing of the photoexcited triplet state of pyrene in polycrystalline Shpol'skii hosts and glassy matrices, A.E. Tringali and H.C. Brenner 226 (1998) 187

Glasses
Spin-lattice relaxation and ODMR linenarrowing of the photoexcited triplet state of pyrene in polycrystalline Shpol'skii hosts and glassy matrices, A.E. Tringali and H.C. Brenner 226 (1998) 187
Self-assembly of alkylsiloxane monolayers on fused silica studied by XPS and sum frequency generation spectroscopy, A.S. Lagutchev, K.J. Song, J.Y. Huang, P.K. Yang and T.J. Chuang 226 (1998) 335

Complex fluids

-micelles

Time-resolved ESR in a spin-correlated radical pair with large hyperfine coupling constant at ^{31}P. Micellar size effects and the role of flip-flop transitions, V.F. Tarasov, H. Yashiro, K. Maeda, T. Azumi and I.A. Shkrob 226 (1998) 251

Thin films

Self-assembly of alkylsiloxane monolayers on fused silica studied by XPS and sum frequency generation spectroscopy, A.S. Lagutchev, K.J. Song, J.Y. Huang, P.K. Yang and T.J. Chuang 226 (1998) 335

Biological systems

Spin-correlated radical pairs: microwave pulse effects on lifetimes, electron spin echo envelope modulations, and optimum conditions for detection by electron spin echo spectroscopy, C.R. Timmel, C.E. Fursman, A.J. Hoff and P.J. Hore 226 (1998) 269

Microscopic and mesoscopic systems

Molecules (neutral and ionic)

Theoretical study on pyrolysis and sensitivity of energetic compounds. (3) Nitro derivatives of aminobenzenes, H.-M. Xiao, J.-F. Fan, Z.-M. Gu and H.-S. Dong 226 (1998) 15

Ionization spectra of $XONO_2$ (X = F, Cl, Br, I) studied by the SAC–CI method, M. Ehara, Y. Ohtsuka and H. Nakatsuji 226 (1998) 113

SubDoppler polarization spectroscopy of OH ejected by vibrational state-selected *trans* HONO($\tilde{A}\,^1A''$): OH vector correlations, energy correlation between coincident OH,NO pairs, and energy transfer pathways, R. Vasudev and S.W. Novicki 226 (1998) 201

-diatomic

New propagator schemes for explicitly time-dependent hamiltonians: applications to the multiphoton dissociation dynamics of diatoms and quantum adiabatic processes, S. Adhikari 226 (1998) 25

Theoretical study of the isotope effects in the non-adiabatic reaction of $Ar^+(J)$ with H_2, D_2, HD, M. Sizun and F. Aguillon 226 (1998) 47

The (2 + 1) REMPI spectroscopy of jet-cooled Br_2, R.J. Donovan, A.C. Flexen, K.P. Lawley and T. Ridley 226 (1998) 217

-small polyatomics

Complete vibrational spectrum of NiCO isolated in solid argon, H.A. Joly and L. Manceron 226 (1998) 61

Absolute photoabsorption cross section of CCl_4 in the energy range 6–250 eV, G.H. Ho 226 (1998) 101

Infrared and Raman spectra, conformational stability, ab initio calculations, and vibrational assignments for cyclopropyldichlorosilane, J.R. Durig, S.W. Hur, M. Dakkouri, A. Grunvogel-Hurst and T.K. Gounev 226 (1998) 125

Theoretical treatment of the electronic circular dichroism spectrum and the optical rotatory power of H_2S_2, M. Pericou-Cayere, M. Rerat and A. Dargelos 226 (1998) 295

The influence of non-adiabatic effects on the outer valence shell photoionisation dynamics of boron trifluoride, D.M.P. Holland, M.A. MacDonald, M.A. Hayes, L. Karlsson and B. Wannberg 226 (1998) 349

-aromatics
Effect of substituents on the spectroscopic properties of all-*trans*-1,6-diphenyl-1,3,5-hexatriene, G. Pistolis and A. Malliaris 226 (1998) 83
Spin-lattice relaxation and ODMR linenarrowing of the photoexcited triplet state of pyrene in polycrystalline Shpol'skii hosts and glassy matrices, A.E. Tringali and H.C. Brenner 226 (1998) 187

-other large
Self-assembly of alkylsiloxane monolayers on fused silica studied by XPS and sum frequency generation spectroscopy, A.S. Lagutchev, K.J. Song, J.Y. Huang, P.K. Yang and T.J. Chuang 226 (1998) 335

Molecular aggregates
Exchange transfer in high-nuclearity mixed valence magnetic clusters: Theoretical approach and expected manifestations, J.J. Borrás-Almenar, E. Coronado, A.V. Palii, B.S. Tsukerblat and R. Georges 226 (1998) 231

-van der Waals molecules
Single- versus multi-state DIM model for Rg X_2 systems: On the influence of spin–orbit coupling on Ar–I_2 potentials, F.Y. Naumkin 226 (1998) 317

Free radicals (incl. hydronium and muonium)
The EPR spectrum of the general $\rangle\dot{C}-CX_3$ quantum rotor, A.R. Sørnes and N.P. Benetis 226 (1998) 151
Time-resolved ESR in a spin-correlated radical pair with large hyperfine coupling constant at ^{31}P. Micellar size effects and the role of flip-flop transitions, V.F. Tarasov, H. Yashiro, K. Maeda, T. Azumi and I.A. Shkrob 226 (1998) 251
Spin-correlated radical pairs: microwave pulse effects on lifetimes, electron spin echo envelope modulations, and optimum conditions for detection by electron spin echo spectroscopy, C.R. Timmel, C.E. Fursman, A.J. Hoff and P.J. Hore 226 (1998) 269

Phenomena

Molecular structure
Theoretical study on pyrolysis and sensitivity of energetic compounds. (3) Nitro derivatives of aminobenzenes, H.-M. Xiao, J.-F. Fan, Z.-M. Gu and H.-S. Dong 226 (1998) 15
Complete vibrational spectrum of NiCO isolated in solid argon, H.A. Joly and L. Manceron 226 (1998) 61
Infrared and Raman spectra, conformational stability, ab initio calculations, and vibrational assignments for cyclopropyldichlorosilane, J.R. Durig, S.W. Hur, M. Dakkouri, A. Grunvogel-Hurst and T.K. Gounev 226 (1998) 125

Vibrations and rotations of molecules
Vibrational relaxation of SF_6 by the noble gases as measured by CO_2-laser light attenuation in the presence of radial density profiles, M. Lenzi, E. Molinari and G. Piciacchia 226 (1998) 143
SubDoppler polarization spectroscopy of OH ejected by vibrational state-selected *trans* HONO($\tilde{A}\,^1A''$): OH vector correlations, energy correlation between coincident OH,NO pairs, and energy transfer pathways, R. Vasudev and S.W. Novicki 226 (1998) 201

Electronic structure and states
Theoretical study on pyrolysis and sensitivity of energetic compounds. (3) Nitro derivatives of aminobenzenes, H.-M. Xiao, J.-F. Fan, Z.-M. Gu and H.-S. Dong 226 (1998) 15
Absolute photoabsorption cross section of CCl_4 in the energy range 6–250 eV, G.H. Ho 226 (1998) 101
Ionization spectra of $XONO_2$ (X = F, Cl, Br, I) studied by the SAC–CI method, M. Ehara, Y. Ohtsuka and H. Nakatsuji 226 (1998) 113
Theoretical treatment of the electronic circular dichroism spectrum and the optical rotatory power of H_2S_2, M. Pericou-Cayere, M. Rerat and A. Dargelos 226 (1998) 295
Single- versus multi-state DIM model for RgX_2 systems: On the influence of spin–orbit coupling on Ar–I_2 potentials, F.Y. Naumkin 226 (1998) 317

Critical behavior and phase transitions
Influence of the Piepho-mode on charge ordering in mixed-valence biferrocenium salts. Mössbauer spectra, S. Klokishner, J. Linares and F. Varret 226 (1998) 171

Molecular self-assembly and -organization
Self-assembly of alkylsiloxane monolayers on fused silica studied by XPS and sum frequency generation spectroscopy, A.S. Lagutchev, K.J. Song, J.Y. Huang, P.K. Yang and T.J. Chuang 226 (1998) 335

Spin splittings
Spin-correlated radical pairs: microwave pulse effects on lifetimes, electron spin echo envelope modulations, and optimum conditions for detection by electron spin echo spectroscopy, C.R. Timmel, C.E. Fursman, A.J. Hoff and P.J. Hore 226 (1998) 269

Optical activity
Theoretical treatment of the electronic circular dichroism spectrum and the optical rotatory power of H_2S_2, M. Pericou-Cayere, M. Rerat and A. Dargelos 226 (1998) 295

Molecular interactions
A mid infrared study of dynamic processes in iodine–pyridine charge transfer complexes, T. Tassaing, M. Besnard and J. Yarwood 226 (1998) 71
Single- versus multi-state DIM model for RgX_2 systems: On the influence of spin–orbit coupling on Ar–I_2 potentials, F.Y. Naumkin 226 (1998) 317

Spectral bandshapes and intensities
A mid infrared study of dynamic processes in iodine–pyridine charge transfer complexes, T. Tassaing, M. Besnard and J. Yarwood 226 (1998) 71

Coupling of electronic and nuclear motion
The influence of non-adiabatic effects on the outer valence shell photoionisation dynamics of boron trifluoride, D.M.P. Holland, M.A. MacDonald, M.A. Hayes, L. Karlsson and B. Wannberg 226 (1998) 349

Energy transfer processes
Spin-lattice relaxation and ODMR linenarrowing of the photoexcited triplet state of pyrene in polycrystalline Shpol'skii hosts and glassy matrices, A.E. Tringali and H.C. Brenner 226 (1998) 187

Molecular photophysical processes
Absolute photoabsorption cross section of CCl_4 in the energy range 6–250 eV, G.H. Ho 226 (1998) 101
Excited-state intramolecular proton transfer in 2-(2′-aminophenyl) benzimidazole, S. Santra and S.K. Dogra 226 (1998) 283
The influence of non-adiabatic effects on the outer valence shell photoionisation dynamics of boron trifluoride, D.M.P. Holland, M.A. MacDonald, M.A. Hayes, L. Karlsson and B. Wannberg 226 (1998) 349

Photochemistry
Ionization spectra of $XONO_2$ (X = F, Cl, Br, I) studied by the SAC–CI method, M. Ehara, Y. Ohtsuka and H. Nakatsuji 226 (1998) 113
Time-resolved ESR in a spin-correlated radical pair with large hyperfine coupling constant at ^{31}P. Micellar size effects and the role of flip-flop transitions, V.F. Tarasov, H. Yashiro, K. Maeda, T. Azumi and I.A. Shkrob 226 (1998) 251

Luminescence spectra, yields and lifetimes
Effect of substituents on the spectroscopic properties of all-*trans*-1,6-diphenyl-1,3,5-hexatriene, G. Pistolis and A. Malliaris 226 (1998) 83
Excited-state intramolecular proton transfer in 2-(2′-aminophenyl) benzimidazole, S. Santra and S.K. Dogra 226 (1998) 283

Nonlinear responses (incl. optical)
Bond-charge calculation of nonlinear optical susceptibilities of $LiXO_3$ type complex crystals, D. Xue and S. Zhang 226 (1998) 305

Reactions (incl. dissociation)
Theoretical study on pyrolysis and sensitivity of energetic compounds. (3) Nitro derivatives of aminobenzenes, H.-M. Xiao, J.-F. Fan, Z.-M. Gu and H.-S. Dong 226 (1998) 15
Theoretical study of the isotope effects in the non-adiabatic reaction of $Ar^+(J)$ with H_2, D_2, HD, M. Sizun and F. Aguillon 226 (1998) 47

Tunneling
Inelastic neutron scattering study of methyl tunnelling in an oriented single-crystal of 2,6-dimethylpyrazine at low temperature and rotational–potential calculations, B. Nicolaï, E. Kaiser, F. Fillaux, G.J. Kearley, A. Cousson and W. Paulus 226 (1998) 1
The EPR spectrum of the general $>\dot{C}-CX_3$ quantum rotor, A.R. Sørnes and N.P. Benetis 226 (1998) 151

Electron transfer
Influence of the Piepho-mode on charge ordering in mixed-valence biferrocenium salts. Mössbauer spectra, S. Klokishner, J. Linares and F. Varret 226 (1998) 171
Exchange transfer in high-nuclearity mixed valence magnetic clusters: Theoretical approach and expected manifestations, J.J. Borrás-Almenar, E. Coronado, A.V. Palii, B.S. Tsukerblat and R. Georges 226 (1998) 231

Proton and hydrogen atom transfer
Excited-state intramolecular proton transfer in 2-(2′-aminophenyl) benzimidazole, S. Santra and S.K. Dogra 226 (1998) 283

Ionization (incl. Rydberg states)
Absolute photoabsorption cross section of CCl_4 in the energy range 6–250 eV, G.H. Ho 226 (1998) 101
Ionization spectra of $XONO_2$ (X = F, Cl, Br, I) studied by the SAC–CI method, M. Ehara, Y. Ohtsuka and H. Nakatsuji 226 (1998) 113
The (2 + 1) REMPI spectroscopy of jet-cooled Br_2, R.J. Donovan, A.C. Flexen, K.P. Lawley and T. Ridley 226 (1998) 217

Isotopic effects
The EPR spectrum of the general $\rangle\dot{C}–CX_3$ quantum rotor, A.R. Sørnes and N.P. Benetis 226 (1998) 151
